THE BEST COLLECTION OF AGRICULTURAL AND CONSTRUCTION TOOLS

ASAKA INDUSTRIAL CO., LTD

About Us

Asaka Industrial CO.,LTD is a Japanese Agricultural & Construction Tools manufacturer based in Sakai, Osaka Prefecture. Founded in 1661 (roughly 350 years ago), we started out as a specialty knife merchant, becoming one of Sakai's most well-known and long-established businesses.

About 120 years ago, anticipating rapid expansion of the Japanese civil engineering, mining, and railway industries as a result of Westernization, we shifted the focus of our business. While all shovels and scoops in Japan had previously been imported, in 1893, we became the first domestic producer of shovels and scoops, earning a place as one of the top players in the industry.

Currently, we offer a range of everyday goods designed to make peoples' lives easier in addition to our shovels and scoops. Utilizing the expertise we've built up over our 350 year history, we hope to continue delivering products that meet society's needs.

Shovel and Scoop Series

Easy to hold, our shovels are the preferred choice of workers everywhere, while our products are available in stainless steel and lightweight aluminum in addition to classic steel, in order to maximize ease of use and give our customers a wide range of products from which to choose the one that best fits their purpose.

As well as the traditional round point, square, and, we also offer American style and perforated types.

Our original heat treatment process, automatic production line, and quality testing system ensure reliably high quality.

Lopper and Garden Shear Series

The blades are made from heat treated "Yasuki Clad Steel" for excellent resistance to abrasion, and because the steel is solid right to its core, these shears will maintain their sharp cutting edge even after extended use.
