浅香工業株式会社
ASAKA INDUSTRIAL CO.,LTD

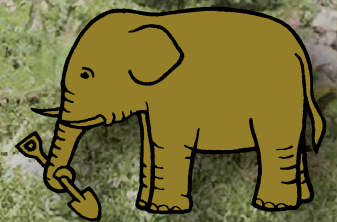

About us

Asaka Industrial CO.,LTD. is a Japanese Agricultural & Construction Tools manufacturer based in Sakai, Osaka Prefecture. Founded in 1661 (roughly 360 years ago), we started out as a specialty knife merchant, becoming one of Sakai's most well-known and long-established businesses.

About 130 years ago, anticipating rapid expansion of the Japanese civil engineering, mining, and railway industries as a result of Westernization, we shifted the focus of our business. While all shovels and scoops in Japan had previously been imported, in 1893, we became the first domestic producer of shovels and scoops, earning a place as one of the top players in the industry.

High-quality Asaka shovels—ergonomically designed, easy to use, and durable—have gained widespread popularity, and our Elephant logo is a symbol of strength, ease of use, and robustness that is beloved throughout the world.

Elephant shovels are designed to "cut earth." We began with edged tools. Our blade-sharpening expertise guarantees keen cutting edges for shovels and ensures easy penetration of even hard soil. Elephant shovel blades are also hard yet flexible, thanks to our sophisticated heat treatment technology, which includes quenching and tempering. An extremely hard yet flexible shovel blade makes it easy to excavate earth and stones. Expertise and specialized technology, honed over 360 years. Asaka is proud to produce products that are second to none.

Our spades and shovels Technology

Material

We use special mechanical structural carbon steel which we created ourselves for spades and shovels.

Technology of Quenching and tempering

Thanks to our heat treatment technology, Our spades and shovels will be never break and never bend even though we use thinner steel plate than others. Our products are lightweight and durable.

Ensuring reliably high quality

Super Lightweight Spade

- Aluminum Pipe Handle T-Grip Spade Series -

We finally have developed amazing spade which is used lightweight and durable handle for European market.

APT spade seires makes it possible for you to free from tough work such as agriculture, construction and gardening.

We beleive that once you use them, you can't go back others anymore.

The handle is used aluminum pipe to reduce weight. In addition, the handle shaft is made unique shape to increase its strength.

As a result, all products in the APT series are lightweight, weighing less than 2.0kg.

APT-Series

■ APT-G spade

Item No.005049
Entire length :1150mm
Head length : 300mm
Head width :185mm
Head thickness :1.7mm
Weght :1.7kg

■ APT-R247

Item No.005051
Entire length :1150mm
Head length : 300mm
Head width :220mm
Head thickness :1.8mm
Weght :1.8kg

■ APT-D spade

Item No.005052
Entire length :1210mm
Head length : 345mm
Head width :139mm
Head thickness :2.1mm
Weght :1.7kg

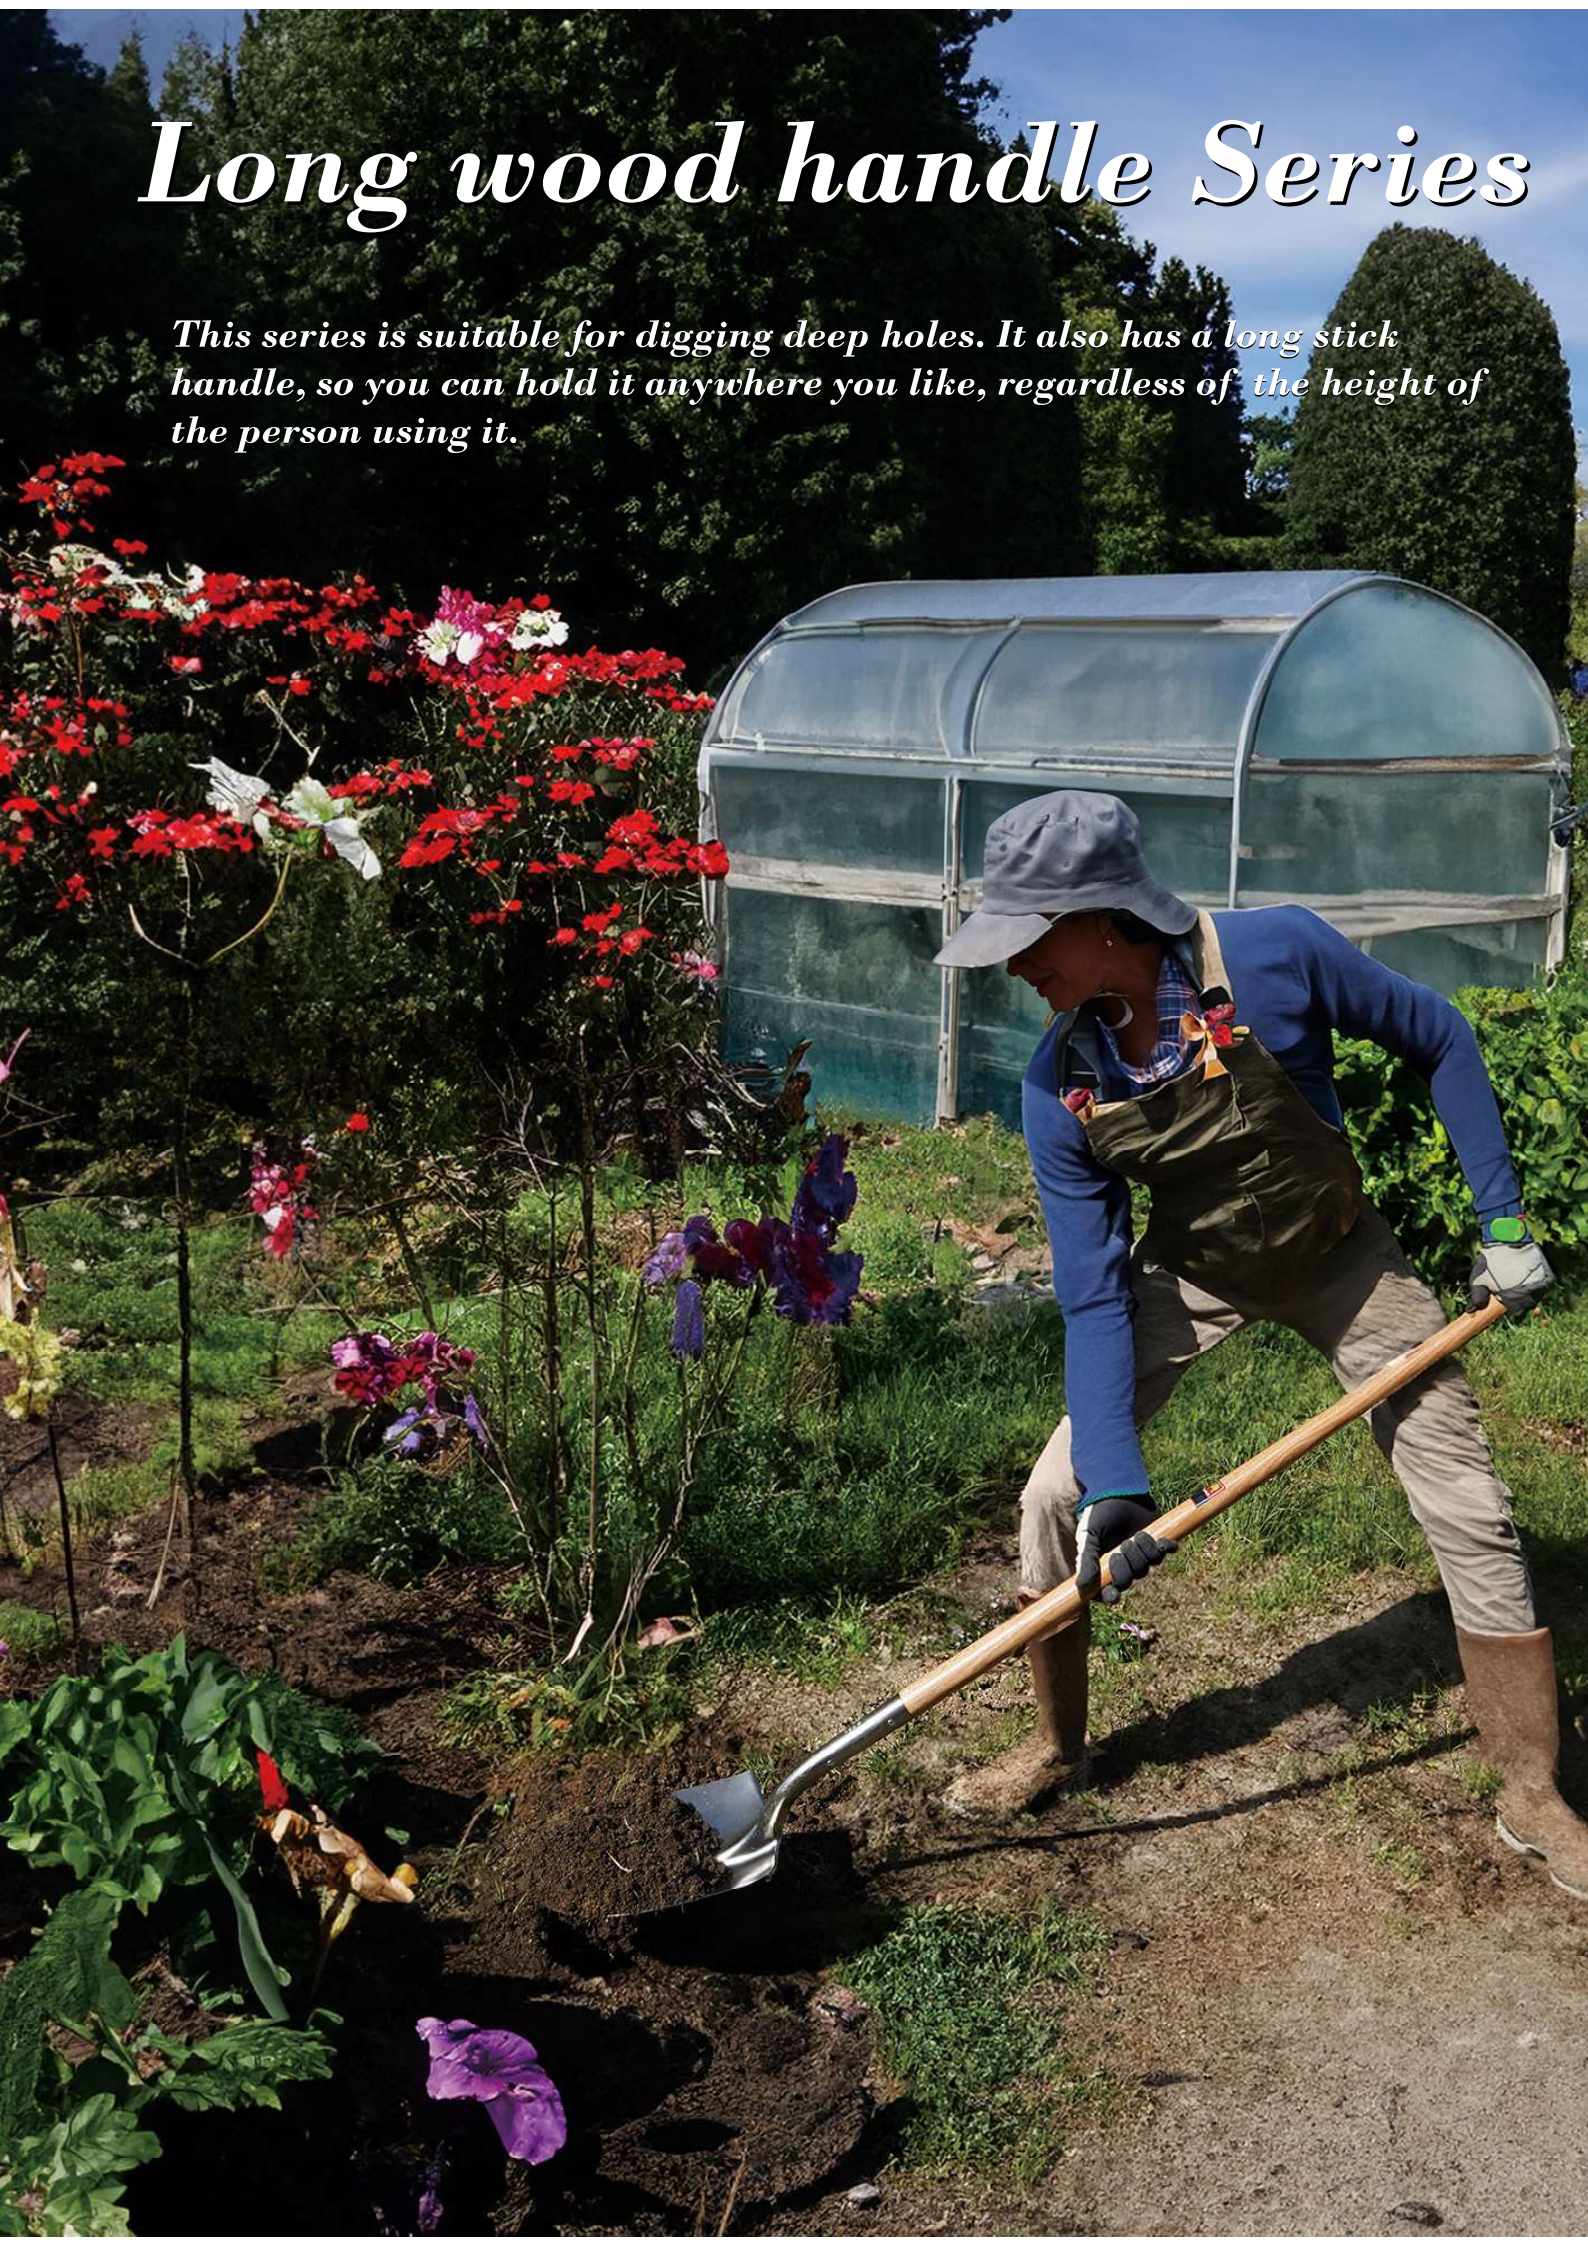

■ APT-TRs

Item No.005053
Entire length :1130mm
Head length : 290mm
Head width :130mm
Head thickness :2.1mm
Weght :1.6kg

Long wood handle Series

This series is suitable for digging deep holes. It also has a long stick handle, so you can hold it anywhere you like, regardless of the height of the person using it.

LW-Series

■ ***LW-G spade***

Item No.005054

Entire length :1510mm

Head length : 300mm

Head width :185mm

Head thickness :1.7mm

Weght :1.8kg

■ ***LW-R247***

Item No.005055

Entire length :1485mm

Head length : 300mm

Head width :220mm

Head thickness :1.8mm

Weght :1.9kg

■ ***LW-D spade***

Item No.005056

Entire length :1550mm

Head length : 345mm

Head width :139mm

Head thickness :2.1mm

Weght :1.9kg

■ ***LW-TRs***

Item No.005057

Entire length :1480mm

Head length : 290mm

Head width :135mm

Head thickness :2.1mm

Weght :1.8kg

All Steel Shovel Series

This series is a highly durable model as all parts are made of steel. Also, these are the most popular models in Japan and are our flagship products.

All Steel Series

■ P-726

Item No.005593
Entire length :970mm
Head length : 300mm
Head width :185mm
Head thickness :1.7mm
Weght :1.7kg

■ LP-726

Item No.005271
Entire length :1105mm
Head length : 300mm
Head width :185mm
Head thickness :1.7mm
Weght :1.9kg

■ P-100

Item No.005830
Entire length :815mm
Head length : 222mm
Head width :167mm
Head thickness :1.45mm
Weght :1.1kg

■ P-200

Item No.005098
Entire length :970mm
Head length : 292mm
Head width :232mm

A close-up photograph of a person's legs and feet wearing black rubber boots with red accents, standing on a patch of dirt and grass. The person is using a post hole digger, which has two long silver handles and a black metal head. The head of the digger is positioned over a hole already dug into the ground, and it is filled with dark brown soil. The background shows more green grass and some small pink flowers.

Post Hole Diggers

Post hole diggers are used to dig vertical holes for erecting poles, stakes and so on.

Their heads are performed quenching and tempering same as spades, making it highly durable and long lasting.

Item No.080367
Entire length :900mm
Handle length : 350mm
Weght : 1.3kg
Hole diameter : 75mm

■ SD-60

Item No.080368
Entire length :900mm
Handle length : 350mm
Weght : 1.3kg
Hole diameter : 60mm

■ SD-45

Item No.080366
Entire length :900mm
Handle length : 350mm
Weght : 1.1kg
Hole diameter : 45mm

A person wearing a grey jacket, blue jeans, and green rubber boots is using a long-handled metal rake to work the soil in a field. The rake is positioned diagonally across the frame, with the head of the rake in the foreground and the handle extending towards the upper left. The ground is dark and appears to be recently tilled, with some dry grass and straw visible. The background is a blurred field with some green grass and a line of trees in the distance.

Agricultural tools

We carry a wide variety of agricultural tools such as rakes, weeding hoes, and digging hoes. Thanks to our techniques such as heat treatment and blade sharpening, as well as the strength of the materials, the quality of each item exceeds expectations.
